

HEALTH & SAFETY STRATEGY

Demonstrating Value

Creating an environment of safety excellence is fundamental to the success of our Business. If people are not safe, or don't feel safe, we cannot deliver our business objectives.

Collaborative Working

Everyone in the Organisation is part of our safety management, it is a shared responsibility. We ensure fairness, consistency, and transparency.

Culture, People & Leadership

Our safety culture is defined by our people and shaped by our leadership teams. We empower our people to act if they believe something is unsafe and we actively encourage improvement suggestions.

Managing Risk

Risk management is integral to all our work activities and ways of working. We value the safety of our people to the same standard, wherever they work and whatever role they undertake.

Embracing Innovation

We actively look for new ways of working that achieve our joint goals of efficiency and effectiveness by creating a safe and healthy workplace.
